Monthly Profit Trend

## Insights

- ▶ Electronics generated over 85% of the company's total profit.
- ▶ East region generates the highest Revenue and Profit.
- ▶ Laptop contributed 56.63% of the company's total profit despite having only 93 orders.
- ▶ Discounting is roughly flat across products (~10%), so profit differences are driven by product strength, not discount depth.
- ▶ Top selling products by volume were Mouse, Headphones, Desk, Backpack, and Phone.
- ▶ Neha was the top-performing salesperson, recording the highest number of orders (191), and generating the highest total profit (₹24.82 lakh).
- ▶ Monthly profit peaked in May at approximately ₹1.4M.

## Business Recommendations

- ▶ Double down on Electronics and East region — they're the clear profit engines and deserve priority in inventory and marketing.
- ▶ Reassess discount strategy on low performers (Desk, Bottle, Notebook, Pen) and replicate Neha's sales approach across the team.
- ▶ Prepare for seasonal demand around May and protect current strategy on top earners (Laptop, Phone).
